Attn: Mr. James Hammer, Operations Manager
Subject: Transport Canada Acceptance of FAA STC SA02049AK
Reference: FAA Application Letter, Signed July 14, 2022
FAA e-mail data transmittal, dated July 20, 2022

This is in response to the reference FAA application letter requesting Transport Canada approval of FAA STC SA02049AK – Installation of Airglas Engineering Co. Cargo Pod Kit on select Aviat Aircraft and Cub Crafters model aircraft.

In accordance with our current policy associated with the review of foreign STCs, some STCs applicable to certain categories of aircraft may be accepted solely on the basis of their foreign certification, and do not require the issue of a corresponding certificate by Transport Canada. The subject STC falls within these criteria.

This STC will be entered in the national index of STCs that have been reviewed and accepted by Transport Canada for installation on Canadian-registered aeronautical products. Please note that this STC acceptance reflects only those aircraft models cited in the referenced FAA Application Letter at the time of application. Future addition of aircraft models will require application to Transport Canada in accordance with the Implementation Procedures for Airworthiness between the FAA and Transport Canada.

This letter confirms formal acceptance of STC SA02049AK by Transport Canada.

Best regards,
